

## SAMUEL CHARO MWENI

Washington, DC | +1 (202) 699 5029 | sarcharo@gmail.com | <https://www.linkedin.com/in/samuel-mweni/>

---

### EDUCATION

#### AMERICAN UNIVERSITY

*Master of Science in Data Science*

#### Technical University of Mombasa

*Bachelor of Science in Statistics and Computer Science*

**Washington, DC**

*May 2024*

**Mombasa, Kenya**

*November 2019*

---

### WORK EXPERIENCE

#### National Institute of Health (NIH)

*Business Analyst Intern*

**Washington, DC**

*January 2024- May 2024*

- Conducted stakeholder interviews with NIH employees to gather insights on user experience, challenges, and feedback regarding the Visual Text Tool (VTT).
- Collaborated with a cross-functional team of researchers, data scientists, and developers to assess requirements and enhance text annotation workflows.
- Researched and evaluated alternative text annotation tools, identifying key industry solutions (Gate, Inception, Label Studio) for comparison.
- Established a structured evaluation framework based on 8 critical metrics, including HIPAA compliance, text originality retention, and machine readability.
- Developed a baseline model for evaluating text annotation tools, ensuring alignment with NIH's compliance, usability, and data integrity standards.
- Performed gap analysis between VTT's existing capabilities and industry best practices, identifying key improvement areas.
- Developed a detailed recommendation report with data-driven insights, assisting NIH in optimizing their text annotation workflow.

#### Cladfy Financial Services

*Analyst*

**Nairobi, KE**

*April 2019- June 2022*

- Led stakeholder engagement & business requirements gathering, conducted interviews, collaborated with teams using Jira and Confluence to identify business needs, and solved the business case.
- Developed interactive dashboards & reports, designed Tableau dashboards to track 15+ financial KPIs, improving real-time monitoring and accelerating decision-making by 25%.
- Performed data analysis & statistical modeling – Used SQL and Excel to analyze loan performance, customer transaction patterns, and risk profiles, leading to a 15% increase in customer retention.
- Optimized business processes & compliance – Mapped business workflows using Lucidchart and Visio, ensuring compliance while handling sensitive financial data for 10,000+ lending clients.
- Implemented process improvement initiatives – Conducted gap analysis, identified inefficiencies in lending workflows, and introduced strategies, reducing manual work by 30% and improving operational efficiency.

---

### CONSULTING PROJECT

#### INRIKA-Budget Optimization System

- Led Requirement Gathering & Stakeholder Analysis, conducted interviews, workshops, and document analysis to gather business needs, creating the Business Requirement Document (BRD).
- Developed UML Diagrams & Process Models, Created Use Case, Activity, and Sequence Diagrams to define workflows for budget submission, approval, and tracking, ensuring clear system architecture.
- Performed Data Analysis and visualization, using Power BI to build dashboards tracking budget utilization, financial KPIs, and variance analysis, improving financial decision-making.
- Conducted Gap & Risk Analysis, compared manual budgeting vs. automated system, identified inefficiencies, and assessed GDPR & SOX compliance for secure financial data handling.
- Facilitated UAT & Post-Production Support, created test cases, managed stakeholder feedback, ensured defect resolution before going live, and supported training & adoption for system users.

---

### SKILLS & PROFESSIONAL AFFILIATION

- **Languages & Tools:** Python (NLTK, Pandas, Scikit-learn), R, SQL, JavaScript, Jira, Lucid chart
- **Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Microsoft Office, Slack, Process Improvement
- **Other:** Project Management, Data Governance, HIPAA/FERPA Compliance, Confluence
